

Common Sense 2 Config Menu Changes

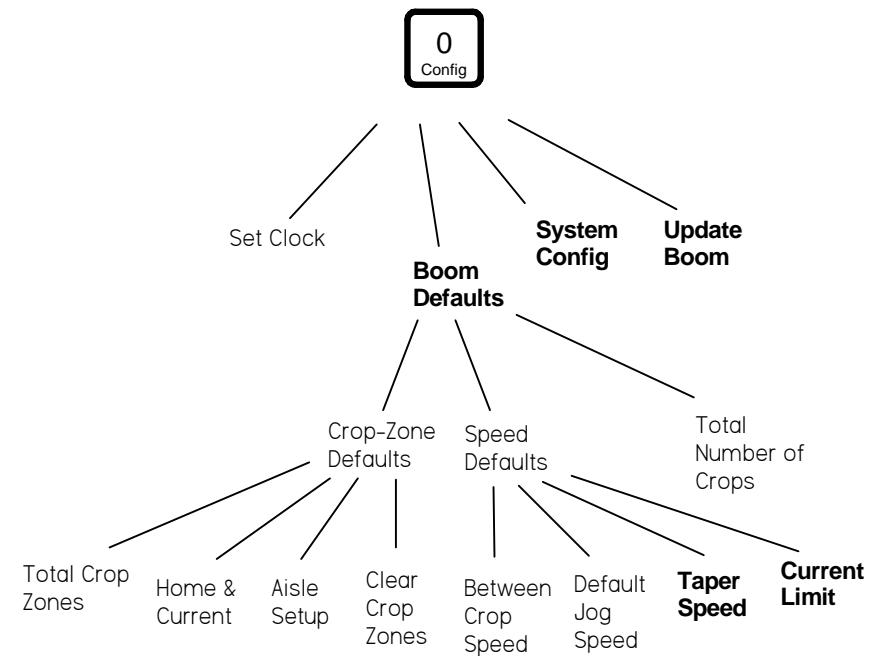

Old

Original Common Sense Controller config menu

New

Common Sense 2 Controller Config menu- new screens in **bold**

Taper Speed - When the leading reader sees the end-of-zone magnet at the end of a pass, the boom slows down to the taper speed *if it is slower than the speed for the pass*. When the boom

Current Limit - an extra digital fuse - does not work.

System Config - Virtual dipswitches which replace the old physical dipswitches on the Common Sense Main Board. Toggle on and off with number keys like valves.
