How to Return a Circuit Board for

Terms and Conditions

What *You* Agree To

Not to send circuit boards to Arthur Space Jr. or GTI without an RMA number; call GTI to get one.

That Arthur Space Jr. or GTI may call a circuit board "unrepairable" for any reason.

Your board might get wrecked during assessment or repairs.

Your "unrepairable" board might come back to you with removed parts in a bag. Also, some parts might be missing.

If you send your board in, you're agreeing to pay the assessment or repair fees.

You arrange and pay for shipping to the repair center.

You must check the GTI Website and read the ***latest*** Board Return Guidelines - **and only send circuit boards in for repair if you understand and agree to them.** Please contact us at 1-888-827-5204 if you have any questions.

What *We* Agree To

We are confident that you will be satisfied with the quality and timing of our repairs. If they are late or you are dissatisfied with the results, please call us. We are willing to consider not charging for the repair.

If you receive a board that is "repaired" or "no problem found" but it still malfunctions, we owe you one free repair on that board. Please reference the RMA number of the unsuccessful repair when calling for a free repair-redo. **Fair warning!** The board may be declared unrepairable if the problem is still undetectable. Troubleshooting and investigation may be the best bet before a repair-redo.

How to Return a Circuit Board for Repair

1. Your Board Malfunctions

2. Call GTI

Telephone tech support is free for the life of your product
Your problem might be solved through troubleshooting!
GTI Toll-Free: 1-888-827-5204

3. Remove Board from Controller

Power the machine / board down first!
Do not touch or hold onto board components (except transformer).
No unwiring is required. Carefully remove wire terminal blocks from board pins.
Remove the board-to-enclosure-attachment screws.
Grip the transformer and remove the board from the enclosure.

If you would like for “unrepairable” boards to be returned to you, please remember to **let us know** when you call for an RMA Number. By default, unrepairable boards are recycled (and the recycle credit is applied) unless you have other boards returning to you – in this case they may be sent back to you as well.

4. Take a Picture of Your Board or Write Down Board Info:

Board Code
Software Version
Problem Description

5. Get RMA Number

Call or email GTI.
Give us the picture or the board info.
For each board, let us know what to do if it's "unrepairable":
 Ship back to you;
 or recycle (for a \$30 credit).
Specify UPS level (Ground, Next Day Air, etc.)
Request expedited RMA (extra charge), if needed.

6. Pack Board

Carefully wrap board in pink static-free bubble wrap.
Bubble wrap should be 1" deep all around for big boards.
Place the wrapped board in a box with crumpled paper or bubble wrap so that the contents don't shift in transit.
No foam peanuts or shredded paper.
Do not apply pressure to board components!
Put RMA number in "attention" line of shipping label

7. Send Board to:

Arthur Space Jr.
809 Bayard Street, Bristol, PA 19007
GTI (if you are in Canada)
5041 Macha Rd, Wallis, TX 77485

8. We assess your board and do one of 4 things:

Repair it and ship it back to you;
call it "**No Problem Found**"* and ship it back to you;
call it "**Unrepairable**"* and ship it back to you, if you chose this option;
or call it "**Unrepairable**"* and put it in E-waste Recycling

*Note : GTI or Arthur Space Jr. may call a board "No Problem Found" or "Unrepairable" for any reason.

9. Try your board out when it arrives.

If it doesn't work, you may be eligible for a warranty repair.
Call GTI if you have any problems with the board.
GTI Toll-Free: 1-888-827-5204

If you would like for "unrepairable" boards to be returned to you, please remember to **let us know** when you call for an RMA Number. By default, unrepairable boards are recycled (and the recycle credit is applied) unless you have other boards returning to you – in this case they may be sent back to you as well.

'Unrepairable' Boards

What is an '**unrepairable**' board?

It *might not* be unrepairable. Maybe, if you take it to someone else, they can repair it.

It is a board that GTI does not want to repair because:

We tried but were unable to fix the problem within what we think is a reasonable amount of effort / time / money;

We believe that it may not be reliable once repaired;

The problem is intermittent and it's hard to know if we have solved it;

Or some other reason (**GTI may call a board unrepairable for any reason, at our own discretion**).

Here's what might happen with your '*unrepairable*' boards –

If there are any '*repaired*' or '*no problem found*' boards being returned to you, your unrepaired boards might be shipped back to you as well.

If there are no '*repaired*' or '*no problem found*' boards from your RMA, unrepairable boards are typically put in e-waste recycling.

If you have a specific preference for your '*unrepairable*' boards (if you want any or all returned or recycled), please let us know when you ask for an RMA Number.

Pricing

Sample Prices for a 1-board RMA:

Note: You may **expedite an RMA for a \$50 extra charge** on the whole shipment

Note: Damage to boards due to poor packing by the greenhouse may incur additional charges.
